### **Introduction:**

American Bird Conservancy (ABC) is the Western Hemisphere's bird conservation specialist — the only organization with a single and steadfast commitment to achieving conservation results for birds and their habitats throughout the Americas. We are currently looking for a motivated, self-starting, and detail-oriented individual with forestry experience to join our Great Lakes team in northern Michigan.

This individual will work effectively with private forest landowners, Natural Resources Conservation Service (NRCS), and other local partners in Michigan to implement best management practices (BMP's) on non-industrial private lands for focal bird species. The Private Lands Forester will work with project partners to identify focal species that best represent the needs of various forest cover types in the UP of Michigan. The Private Lands Forester will lead an effort to develop habitat management prescriptions for each focal species selected and work with the Michigan NRCS State Forester and State Biologist to develop technical notes for each of the habitat prescriptions.

### **To Apply:**

Applicants should submit a cover letter and resume to Shawn Graff, Vice President, Great Lakes Region by February 25, 2019

Please apply online at BambooHR.com: <https://abcbirds.bamboohr.com/jobs/view.php?id=41>

If you have trouble, please send your cover letter and resume as one document to [HR@abcbirds.org](mailto:HR@abcbirds.org)
