

DYNAMIC OPPORTUNITY
Washington State Department of Natural Resources
Forest Engineer – Timber Sales
Natural Resources Engineer 2
Recruitment # 2017-01-5808-00822

DO YOU WANT TO MAKE A DIFFERENCE? WE INVITE YOU TO LEARN MORE~

SALARY RANGE:

\$4,005 – \$5,253 per month plus a comprehensive benefit package and retirement. We also offer a life work balance and generous paid vacation and sick leave. We have 11 paid state holidays.

LOCATION:

Chehalis, Washington

CLOSES:

February 26, 2017

Note: Recruitment may be extended after February 26th depending on the quantity and quality of the application pool.

Lewis District is actively seeking a permanent Forest Engineer supporting the timber sales and forest roads programs. We're looking for someone who has strong written and verbal communication skills, the ability to create solutions, and loves to work in the woods. Our team of engineers and foresters offers a collaborative and dynamic environment where you can grow personally and professionally.

This Forest Engineer position maintains, designs, and coordinates forest road construction on state-managed lands while minimizing impacts to surrounding landscapes and waters. As a Forest Engineer you will work with foresters and biologists to create successful logging plans for DNR's timber sales program by analyzing logging system feasibility, and road infrastructure use and costs.

These Forest Engineer positions are seen as providing leadership development opportunities within the agency and can offer you broad exposure to all levels of management and professional development. For candidates willing to take the next step, opportunities include a development pathway toward management positions, professional engineering licensure, and/or executive developmental assignments. DNR employees provide professional, forward-looking stewardship of our state lands, natural resources, and environment by providing leadership in creating a sustainable future for the Trusts and all Washington citizens. If you are looking for a job that combines the need to challenge your analytical mind with your love of the outdoors, join our team in Lewis District and help us meet our goals while we help you meet your own.

REQUIRED QUALIFICATIONS:

- Knowledge of forest engineering principles, techniques and application such as: logging systems, harvest system design, and road transportation design
- Knowledge of ground and cable logging systems, and forest road construction equipment and use
- Use of engineering equipment, tools and software
- The ability to communicate effectively in verbal and written context
- The ability to work independently on assigned tasks
- The ability to develop, plan, implement and manage activities to meet targets and deadlines
- Knowledge of forest management objectives and timber management planning
- Proven ability in computer applications such as Microsoft Word and Excel
- A documented history and continual commitment to safe work practices

This level of knowledge and skill is *typically* achieved after receiving:

- A Bachelor's degree in Forest Engineering, Civil Engineering, or Forest Operations Management.
