

Vallier Treehaven Resident Ecologist in Tomahawk, WI

This position will contribute to and enhance the College of Natural Resources' Treehaven mission as the Wisconsin center for integrating natural resources education, research, land management and outreach. The successful applicant will be expected to develop and implement stewardship, outreach, and academic activities that promote and enhance stewardship of the Treehaven land base and increase Treehaven's visibility through academic and public outreach. This position will also enhance CNR's mission through innovative teaching and research at Treehaven. It will also be expected to increase program and grant revenues while building capacity in natural resources professional development for the state of Wisconsin. Finally, this position will maintain communication and coordination with Treehaven Director, Treehaven program staff, and faculty and staff in the College of Natural Resources.

To ensure consideration, completed online applications must be received by end of day, 11:59 pm, on **November 15, 2018**. However, screening may continue until the needs of the recruitment are met.
