

Global Forestry Program Leader

Overview

Dow Corning, a U.S. based, multinational corporation and global leader in the silicon-based industry seeks a Forestry Science & Technology engineer, which will be based out of one of our US sites.

Must have un-restricted employment authorization to work in the U.S.

Position Description:

This global role entails developing and implementing sustainable forestry strategies across the Silicon metal production sites in accordance with corporate initiatives and local regulations. This role will work closely with the Silicon Metal Product Line, Technology Center and Supply Chains to understand current operations and future needs and develop solutions to ensure sustainable, low cost supply. This includes understanding optimal forest & plantation locations, recommending tree species, and optimizing wood density on plantations.

Desired Qualifications

B.S. or M.S. degree in Forestry with a minimum of 5 years work experience required. Candidates must have strong communication skills, demonstrated experience in developing and executing strategies, and be able to work within a global organization. The position requires background in research, analytical thinking, and project management as well as the ability to function independently.

Additional Information/Benefits

Dow Corning offers a competitive compensation based on skill and experience as well as a flexible benefits package and is an Equal Opportunity Employer M/F/D/V.
Benefits: Medical Insurance, Life Insurance, Dental Insurance, Vision Insurance, Paid Vacation, Paid Sick Days, Paid Holidays, Short Term Disability, Long Term Disability, 401K/403b Plan, Pension/Retirement, Special Incentive Plans
Screening Requirements: Drug Screen, Criminal Background Check, Physical Exam

Interested Candidates should apply by sending a resume outlining education and work history to: marci.sewell@dowcorning.com
