

# Forest Inventory Program Manager

## About the Position

The Forest Inventory Program Manager is responsible for project development, management, and delivery of projects related to forest inventory data management, timber cruise, due diligence, and other analyses related to forest inventory data (e.g., timber valuation and 631a tax reporting). The Forest Inventory Program Manager is a supervisory position within MB&G's Technical Services Group, a group of professionals with experience in forest inventory design, growth and yield modeling, harvest scheduling, forest policy, GIS, and programming.

In this position you will have to two primary tasks: 1) Project management and 2) Forest inventory data management and analysis.

### **Project management (40%)**

In this position you will manage projects from proposal development to project delivery. You will be a main point of contact for long-term and intermittent clients and will be expected to maintain relationships with these clients. Once projects are underway you will work to ensure projects are completed within the budget and delivered on time to MB&G's high standards by mobilizing staff from across the Technical Services Group and MB&G as a whole. You will work with the Director of Technical Services to ensure projects are adequately resourced and to resolve resource limitations.

### **Forest inventory data management and analysis (60%)**

In this position you will complete forest inventory analysis tasks. These may include year-end or periodic updates of tabular and spatial inventory data, cruise design, discounted cash flow modeling, timber valuation, 631a tax reporting, or other analysis. As needed, you will prepare written reports for clients describing analytical work.

The Forest Inventory Program Manager will perform the following tasks:

- Maintain MB&G's relationships with multiple clients.
- Develop project proposals related to forest inventory management and analysis, and due diligence.
- Manage forest inventory and due diligence related projects with budgets up to approximately \$250,000 and assist with project management on larger projects.
- Lead or assist with forest inventory management including updating tabular and spatial data and preparing reports.
- Provides analytical support to other MB&G projects as assigned. This work often takes the form of forest data exploration and statistical analysis.
- Manages time to meet objectives of multiple concurrent projects.
- Operates independently under minimal supervision.
- Supports MB&G's efforts to develop new clients and to expand services to existing clients.
- Actively promotes MB&G as a premier provider of natural resource consulting services.

## About You

We are looking for talented individuals who want to learn. We are looking for individuals who ask questions about what and why the data looks a certain way. We want individuals who want to test new approaches to solve problems. We need people who represent MB&G's core values of Integrity, Quality, Expertise, and Client Service.

You should possess the following skills, experience, and background:

- BS in forest management, environmental sciences, or similar natural resource related field, an MS is preferred.
- >7 years' experience in forestland data management and analysis, including experience performing year-end or periodic inventory updates for a large (>10,000 acres) forest land manager in the western US.
- Intermediate knowledge of SQL, R, and/or Python.
- Intermediate understanding of statistical methods/procedures, such as regression analysis and inventory design.
- Excellent written and oral communication skills.
- Experience with Remsoft Woodstock is desirable.
- Proven ability to multi-task and meet multiple deadlines.
- Strong attention to detail.
- Experience with MS Access.
- Excellent time management skills.
- Responsive and client service oriented

## About Us

Mason, Bruce & Girard, Inc. is a full-service natural resource consulting firm, with expertise in environmental services, forestry, and geographic information systems (GIS). A set of core values guide our work, focusing our efforts on providing responsible, sustainable solutions that meet client needs.

Our areas of expertise include forestry, wildlife, fisheries, wetlands, water quality, and GIS. Our work is characterized by the highest level of client service, the application of the best science and technology, quality processes and results, integrity, and our respect for the natural environment. We provide natural resource consulting services to both industry and government and have done so since 1921.
