

Seasonal Field Forester

Northwest Management, Inc., a full-service natural resource consulting firm located in Moscow, Idaho, is seeking resumes from motivated individuals with natural resource backgrounds.

Position Availability & Time Frame: Positions are open for qualified candidates available to begin field work in February, March, or April and continue through the end of the calendar year or longer. Time frames and start dates can be flexible.

Location: Based out of the main office in Moscow, Idaho. Extensive "out of town" traveling and driving is required, with expenses paid by the company. A bunkhouse is available for use for those not currently living within the Moscow area. This position works at outdoor settings on forested landscapes and requires extended time in the field on forestry projects. Field personnel work on uneven terrain, while working in all types of weather.

Duties: The Field Forester position predominately revolves around performing inventory services. Your primary role will involve working closely under the direct supervision of a Professional Forester or Natural Resource Specialist, with most of your time dedicated to:

- **Inventory Services:** your foremost responsibility will be the execution of inventory services. This entails the collection of data utilizing both conventional techniques and cutting-edge LiDAR technology-assisted methods. These efforts are aimed at developing precise estimates of marketable timber volume and providing clients with comprehensive insights into forest health and condition.
- **Forest Health Management:** you may also be involved in forest health management activities including the designation and execution of harvest boundaries, riparian buffers, administration of planting initiatives, and the management of forest roads.
- **Hazard Management (Fire and Fuels):** There is the potential for assignments related to hazard management, particularly in the realm of fire and fuels. This may involve opportunities to work with a Wildland Fire Engine and the application of various prescribed burning methods. These activities are designed to mitigate hazardous fuel loads on client-owned properties.
- **Exploring Other Natural Resource Opportunities:** Alongside the core responsibilities, you may also encounter diverse opportunities within the broader Natural Resource industry as they arise.

Desired Qualifications for Candidates:

- Having or pursuing a Forestry or other Natural Resources-related degree
- One field season of natural resource related experience
- Experience with timber cruising, inventory, and forest measurements, as well as timber sales preparation
- Wildland fire experience or prescribed burning techniques
- Familiarity with navigation using map, compass, GPS, and GIS applications
- History of working independently or as a crew member, with minimal supervision while maintaining a high quality of work
- Leadership and planning experience is highly beneficial
